

Information For the User
Losartan (50mg) Tablet

Lorsan 50 Tablet

Lorsan 50 Tablet

Dosage Form: Tablet

Composition:

Each film-coated tablet contains:

Losartan Potassium IP equivalent to Losartan 50 mg

Description:

Lorsan 50 Tablet contains Losartan Potassium, an angiotensin II receptor blocker (ARB), indicated for the management of hypertension. It reduces elevated blood pressure by blocking angiotensin II from binding to AT1 receptors, leading to vasodilation and decreased aldosterone secretion.

Indications:

Essential hypertension

Reduction of cardiovascular risk in hypertensive patients

Dosage & Administration:

Dosage should be as directed by the physician.

Swallow the tablet whole with water.

May be taken with or without food.

Regular monitoring of blood pressure is recommended.

Pharmacological Action:

Losartan selectively inhibits the binding of angiotensin II to AT1 receptors, resulting in vasodilation, decreased secretion of aldosterone, and reduction of blood pressure.

Side Effects:

Dizziness

Headache

Fatigue

Hypotension

Precautions & Warnings:

Use with caution in patients with renal or hepatic impairment.

Not recommended during pregnancy.

Monitor blood pressure periodically.

Use under medical supervision.

Drug Interactions:

Caution with potassium supplements or potassium-sparing agents.

Monitor when used with other antihypertensive medications.

Storage:

Store below 25°C in a cool, dry place.
Protect from light and moisture.
Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.

(An ISO 9001: 2015 Certified Co.)
