

Information For the Use of
Carboxymethylcellulose (0.3% w/w) + Glycerin (1% w/w) Eye Ointment

Lubicom G Eye Ointment

Brand Name: Lubicom G Eye Ointment

Dosage Form: Eye Ointment

Composition:

Each gram contains:

- Carboxymethylcellulose Sodium IP 0.3% w/w
- Glycerin IP 1.0% w/w
- Ophthalmic ointment base q.s.

Description:

Lubicom G Eye Ointment is a lubricating ophthalmic preparation containing Carboxymethylcellulose Sodium and Glycerin. It is indicated for the symptomatic relief of dry eye conditions and ocular surface irritation caused by inadequate tear production or environmental factors. It helps in providing prolonged lubrication, protecting the ocular surface, and improving patient comfort by maintaining moisture on the eye.

Indications:

Indicated for the management of:

- Dry eye syndrome
- Ocular surface dryness and irritation
- Burning and foreign body sensation in the eyes
- Exposure-related corneal dryness
- Tear film deficiency conditions

It helps in relieving dryness, irritation, discomfort, and maintaining ocular surface hydration.

Dosage & Administration:

Apply a small amount of ointment inside the lower eyelid of the affected eye(s) as directed by the physician.

Wash hands thoroughly before application.

Temporary blurred vision may occur immediately after use.

Avoid touching the tip of the tube to the eye or any surface to prevent contamination.

Pharmacological Action:

- Carboxymethylcellulose Sodium acts as a tear substitute and lubricant, forming a protective film over the ocular surface.
- Glycerin functions as a humectant, attracting and retaining moisture to maintain hydration of the ocular tissues.

Together, these actions provide long-lasting lubrication and protection of the ocular surface.

Side Effects:

Common side effects include temporary blurred vision, mild eye irritation, burning sensation, or stickiness after application.

Rarely, allergic or hypersensitivity reactions may occur.

Precautions & Warnings:

- For ophthalmic use only
- Do not use if the product appears contaminated or damaged
- Avoid touching the tube tip to the eye or surrounding surfaces
- Contact lenses should generally be removed before application
- Discontinue use and consult a physician if irritation persists or worsens

Drug Interactions:

No significant systemic drug interactions are expected due to minimal systemic absorption.

When used with other ophthalmic preparations, administer eye drops first and apply the ointment last, allowing an appropriate interval between products.

Storage:

Store below 25°C in a cool, dry place.

Protect from light.

Do not freeze.

Keep the tube tightly closed after use.

Keep out of reach of children.
