

Lubicom-PGP

Lubricant Eye Drops

Polythene Glycol (400) 0.4%w/v +
Propylene Glycol 0.3%w/v Eye Drops

PG 400 & PPG

- ✓ Prolonged Tear Film Breakup Time (TFBUT)
- ✓ Unique property of gelling and lubricating polymer system which adjusts to each patient's individual tear film pH

BIPHASIC MECHANISM OF ACTION

- ✓ It binds to the damaged hydrophobic areas of epithelial cells to add volume to the tear film.
- ✓ Restructure the tear film by forming a protective gel matrix there by providing long lasting protection.
