

Information For the User
Mebeverine (135mg) Tablet

Mebihusk 135 Tablet

Brand Name: Mebihusk 135 Tablet

Dosage Form: Tablet

Composition:

Each tablet contains:

- Mebeverine Hydrochloride 135 mg

Description:

Mebihusk 135 Tablet contains **Mebeverine**, an antispasmodic agent used to relieve smooth muscle spasms of the gastrointestinal tract. It helps in alleviating abdominal pain, discomfort, and bloating associated with irritable bowel syndrome (IBS) and other functional gastrointestinal disorders.

Therapeutic Indication:

Indicated for the management of:

- Irritable Bowel Syndrome (IBS)
- Functional intestinal disorders with abdominal pain or cramping

It helps in **relieving gastrointestinal spasms and associated discomfort**.

Dosage & Administration:

Take as directed by the physician.

Swallow the tablet whole with water, preferably before meals.

Pharmacological Action:

Mebeverine acts directly on the smooth muscles of the gastrointestinal tract, inhibiting abnormal contractions without affecting normal motility. This helps in reducing pain and cramping while maintaining normal digestive function.

Side Effects:

Generally well tolerated. Mild nausea, dizziness, or headache may occur in some patients.

Warnings & Precautions:

- Use with caution in patients with severe liver or kidney impairment.
- Discontinue if hypersensitivity or allergic reactions occur.
- Not recommended for use in children below the advised age unless directed by a physician.

Drug Interactions:

No significant drug interactions reported; however, inform your physician about other medications being taken.

Storage:

Store below 25°C in a cool, dry place. Protect from light and moisture. Keep out of reach of children.
