

Information For the Use
Moxifloxacin (0.5% w/v)

Moxolunic Ear Drop

Moxifloxacin (0.5% w/v) Ear Drops

Composition

- **Moxifloxacin: 0.5% w/v**

Description

Moxifloxacin ear drops contain a broad-spectrum fluoroquinolone antibiotic that works by inhibiting bacterial DNA gyrase and topoisomerase IV. This action prevents bacterial replication, making it highly effective in treating infections caused by Gram-positive and Gram-negative bacteria.

Indications

- Acute otitis externa (infection of the external ear canal)
- Chronic suppurative otitis media (CSOM) with intact tympanic membrane
- Post-surgical prophylaxis or treatment of bacterial ear infections

Dosage and Administration

- **Adults and Children: Instill 2-3 drops into the affected ear(s) twice daily or as directed by a healthcare provider.**
- **Tilt the head or lie down with the affected ear facing upward for a few minutes after application to ensure proper absorption.**

Contraindications

- **Hypersensitivity to Moxifloxacin or any fluoroquinolone antibiotics.**

Precautions

- **Avoid use if there is a suspected or confirmed perforation of the tympanic membrane unless advised by a healthcare professional.**

- **Use with caution in patients with a history of allergic reactions to fluoroquinolones.**
- **Discontinue use if signs of allergic reactions or worsening of symptoms occur.**

Adverse Effects

- **Temporary stinging, itching, or irritation in the ear.**
- **Rarely, allergic reactions such as rash, swelling, or redness may occur.**

Storage

- **Store below 25°C in a cool, dry place, protected from light.**
- **Keep out of reach of children.**

Presentation

Available in a sterile dropper bottle of 5 mL or 10 mL.

Note: Use only as prescribed by a healthcare professional. Prolonged or inappropriate use may lead to the development of antibiotic resistance.
