# Mutyle

Mupirocin ointment 2%

- Monotherapy with mupirocin 2% should be considered as per primary treatment alternative for pitted keratolysis.
- Competitively inhibits bacterial isoleucyl-trna synthetase & inhibit bacterial protein synthesis.
- It is excellent in vitro activity against staphylococci & most streptococci.
- Treatment of secondary infected traumatic skin lesions ( up to 10 cm in length or 100cm<sup>2</sup> in area) due to susceptible strains of S. Aureus & S. Pyogenes
