

Mycophenolate Sodium 180 mg

Potent immunosuppressant for prevention of organ rejection

Inhibits proliferation of T & B lymphocytes by selective action

Reduces risk of acute rejection in renal transplantation

Helps maintain long-term graft survival and function

Well-tolerated with convenient twice daily dosing

Improves quality of life with effective immunosuppression

Indications

Renal Transplantation
(Prevention of Rejection)

Cardiac Transplantation
(Prevention of Rejection)

Liver Transplantation
(Prevention of Rejection)

Pancreatic Transplantation
(Prevention of Rejection)
