

Information For the User
Nebivolol 5 mg + Cilnidipine 10 mg Tablet

Nebiroll C Plus Tablet

Brand Name: Nebiroll C Plus Tablet

Composition:

Each film-coated tablet contains:

Nebivolol IP 5 mg

Cilnidipine IP 10 mg

Therapeutic Indication:

Indicated for the treatment of mild to moderate essential hypertension in patients requiring dual therapy

Useful in patients with coexisting tachycardia, endothelial dysfunction, or left ventricular hypertrophy

Also beneficial in hypertensive patients with a higher cardiovascular risk profile

Mechanism of Action:

Nebivolol is a cardioselective beta-1 blocker with additional vasodilatory effects through nitric oxide modulation

It reduces heart rate and myocardial oxygen demand while preserving peripheral circulation

Cilnidipine is a dual L-type and N-type calcium channel blocker

It promotes vasodilation of peripheral arteries and inhibits sympathetic overactivity, helping control blood pressure without reflex tachycardia

The combination offers synergistic antihypertensive effects and improved vascular protection

Dosage & Administration:

Usual adult dose: one tablet once daily or as directed by the physician

Can be taken with or without food

Swallow the tablet whole with water

Dose adjustments may be needed in elderly patients or those with renal or hepatic impairment

Contraindications:

Hypersensitivity to Nebivolol, Cilnidipine, or any excipient

Severe bradycardia, second or third-degree AV block, decompensated heart failure, cardiogenic shock

Pregnancy and lactation

Warnings & Precautions:

Monitor blood pressure and heart rate regularly during therapy

Use with caution in patients with asthma, diabetes, renal dysfunction, hepatic impairment, or heart conduction abnormalities

Avoid abrupt discontinuation of Nebivolol to prevent rebound hypertension

Cilnidipine may rarely cause ankle edema or flushing

Side Effects:

Common: dizziness, fatigue, headache, peripheral edema, bradycardia

Less common: constipation, flushing, sleep disturbances
Rare: AV block, hypotension, hypersensitivity reactions

Storage:

Store in a cool, dry, and dark place below 25°C
Protect from moisture and sunlight
Keep out of reach of children

Packaging:

Nebiroll C Plus Tablet is available in alu-alu or blister strip packs

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
