

Information For the User  
Nebivolol 5 MG + Hydrochlorothiazide 12.50 MG

# Nebiroll H Tablet

**Brand Name:** Nebiroll H Tablet

**Composition:**

Each film-coated tablet contains:

Nebivolol IP 5 mg

Hydrochlorothiazide IP 12.5 mg

**Therapeutic Indication:**

Indicated for the treatment of essential hypertension in patients requiring combination therapy

Useful in patients not adequately controlled with monotherapy

Reduces the risk of cardiovascular events associated with high blood pressure

**Mechanism of Action:**

Nebivolol is a cardioselective beta-1 blocker with vasodilatory effects mediated through nitric oxide release

It decreases heart rate and myocardial contractility while maintaining peripheral circulation

Hydrochlorothiazide is a thiazide diuretic that promotes diuresis by inhibiting sodium reabsorption in the distal renal tubules

The combination works synergistically to reduce blood pressure by lowering both cardiac output and plasma volume

**Dosage & Administration:**

Usual adult dose: one tablet once daily or as prescribed by the physician

Can be taken with or without food

Swallow whole with water without crushing or chewing

Dose adjustment may be required in renal or hepatic impairment

**Contraindications:**

Hypersensitivity to Nebivolol, Hydrochlorothiazide, sulfonamides, or any excipient

Severe bradycardia, AV block, decompensated heart failure, or cardiogenic shock

Anuria or severe renal dysfunction

Pregnancy and lactation

**Warnings & Precautions:**

Monitor blood pressure, heart rate, renal function, and serum electrolytes periodically

Use cautiously in patients with diabetes, asthma, gout, hepatic impairment, or electrolyte imbalance

Avoid abrupt withdrawal of Nebivolol to prevent rebound hypertension or angina

Hydrochlorothiazide may cause hypokalemia, hyponatremia, hyperuricemia, or hyperglycemia

**Side Effects:**

Common: dizziness, fatigue, increased urination, headache, bradycardia

Less common: electrolyte disturbances, nausea, rash

Rare: photosensitivity, arrhythmia, renal dysfunction, allergic reactions

**Storage:**

Store in a cool, dry, and dark place below 25°C  
Protect from moisture and direct sunlight  
Keep out of reach of children

**Packaging:**

Nebiroll H Tablet is available in blister or alu-alu strip packs

**Schedule:**

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
