

Netahawl

Eye Drops

Netarsudil Solution 0.02% w/v

Lowers intraocular pressure (IOP) by increasing **uveoscleral outflow**.

Helps reduce IOP in patients with **open-angle glaucoma** or ocular hypertension.

Provides a **once-daily dosing** convenience for better compliance.

Well tolerated with a **favorable safety profile** and minimal systemic absorption.

Supports long-term **IOP control** to protect visual field and optic nerve health.

Indications

Open-Angle
Glaucoma

Ocular
Hypertension

Elevated Intraocular
Pressure (IOP)

Optic Nerve
Protection
