

For **Neuropathy & Hyperhomocysteinemia**

NuroslideTM Forte

Methylcobalamin (1500mcg) + Pyridoxine HCL (100mg) +
Niacinamide (100mg) + Benzyl Alcohol 2% v/v Injection

Methylcobalamin :

- Methylcobalamin is one of the active forms of Vitamin B12, which is critical for nerve function, red blood cell formation, and DNA synthesis. It's often used to treat or prevent Vitamin B12 deficiencies.

Niacinamide :

- Niacinamide (also known as nicotinamide) is a form of Vitamin B3. It's well-known for its skin benefits, but also plays a role in cellular metabolism and the conversion of food into energy.

Pyridoxine hydrochloride :

- Pyridoxine hydrochloride is a synthetic form of Vitamin B6, commonly used in supplements and medications. It's the most common form of Vitamin B6 used in supplements, as it is easily absorbed and converted into its active forms (pyridoxal 5'-phosphate) within the body.
