

Information For the User
Chlorhexidine Gluconate (0.2% w/v)

Orastyle Mouth Wash

Orastyle Mouth Wash

(Chlorhexidine Gluconate 0.2% w/v Mouthwash)

Introduction

Orastyle Mouth Wash contains **Chlorhexidine Gluconate (0.2% w/v)**, a powerful **antiseptic and antibacterial agent** widely used for **oral hygiene and gum protection**. It helps reduce **plaque buildup, gingivitis, and bacterial infections**, promoting overall oral health.

Composition & Mechanism of Action

- **Chlorhexidine Gluconate (0.2% w/v)**
 - A broad-spectrum **antiseptic** that eliminates **harmful oral bacteria**.
 - Helps prevent **gingivitis, plaque, and bad breath**.
 - Reduces the risk of **oral infections and post-dental surgery complications**.

Indications & Uses

Orastyle Mouth Wash is recommended for:

- **Gingivitis (gum inflammation and bleeding gums).**
- **Plaque and tartar control.**
- **Mouth ulcers and oral infections.**
- **Post-dental procedures** (extractions, surgeries, implants).
- **Bad breath (halitosis) management.**

How to Use

- **Rinse with 10-15ml** of mouthwash for **30-60 seconds** and then spit it out.
- **Do not swallow.**
- Use **twice daily**, preferably after brushing.
- Avoid eating or drinking for **30 minutes after use** for best results.

Precautions & Warnings

- **Do not swallow** the mouthwash.
- Prolonged use may cause **temporary tooth staining**.
- **Not suitable for children under 12 years** unless advised by a dentist.
- Avoid use if allergic to **Chlorhexidine** or any ingredients in the formulation.

Possible Side Effects

- Temporary **altered taste sensation**.
- Mild **burning or irritation in the mouth**.

- **Brown staining of teeth** (with prolonged use).

Storage & Handling

- Store in a **cool, dry place (below 30°C)**.
- Keep **out of reach of children**.
- Use within the **expiry date** mentioned on the packaging.

Conclusion

Orastyle Mouth Wash (Chlorhexidine Gluconate 0.2%) is an **effective antiseptic solution for maintaining oral hygiene**. It provides **protection against gum diseases, infections, and bad breath**, making it an essential addition to daily oral care.
