

Pacrint 25k Capsule

Composition:

Each enteric-coated capsule contains:

Pancreatin – 300 mg

(Equivalent to not less than: Amylase – 18,000 USP units, Protease – 1,000 USP units, Lipase – 25,000 USP units)

Description:

Pacrint 25k Capsule contains Pancreatin, a mixture of digestive enzymes including amylase, lipase, and protease, derived from porcine pancreas. It is used as pancreatic enzyme replacement therapy (PERT) in patients with exocrine pancreatic insufficiency (EPI), a condition where the pancreas fails to produce sufficient digestive enzymes. The enteric-coated capsule ensures the enzymes are protected from gastric acid and released in the intestine for optimal absorption and action.

Indications:

Exocrine pancreatic insufficiency due to chronic pancreatitis, cystic fibrosis, pancreatic surgery, or pancreatic cancer

Steatorrhea and malabsorption syndromes

Post-gastrointestinal surgery digestive support

Supportive therapy in indigestion and bloating related to enzyme deficiency

Mechanism of Action:

Pancreatin supplements the body's natural digestive enzymes.

Amylase helps break down carbohydrates into simple sugars

Lipase hydrolyzes fats into fatty acids and glycerol

Protease breaks proteins down into peptides and amino acids

Together, these enzymes facilitate proper digestion and nutrient absorption in the small intestine

Dosage and Administration:

Usual dose: One capsule 1–3 times daily with meals or as directed by the physician

Swallow whole with water; do not crush or chew

Dosage may be adjusted based on severity of enzyme deficiency and fat content in the diet

Side Effects:

Generally well tolerated

Occasional abdominal cramps, nausea, diarrhea, or constipation

High doses may cause perianal irritation

Rare: Allergic reactions or hyperuricosuria with prolonged use

Precautions:

Not to be used in patients with pork protein allergy

Use with caution in patients with gout, hyperuricemia, or renal impairment

Adequate hydration should be maintained during therapy

Pregnant and lactating women should use only if clearly indicated by a physician

Storage:

Store in a cool, dry place below 25°C

Protect from heat and moisture

Keep out of reach of children
