

Information For the User
Paracetamol (500mg) Tablet

Paraplom 500 Tablet

Paraplom 500 Tablet

Dosage Form: Tablet

Composition:

Each tablet contains:
Paracetamol I.P. 500 mg

Description:

Paraplom 500 Tablet contains Paracetamol, a widely used analgesic and antipyretic medication. It helps relieve mild to moderate pain and reduce fever by acting on the pain and temperature-regulating centers in the brain. It is commonly used for the symptomatic relief of headache, body aches, toothache, cold, and fever.

Indications:

Fever
Headache
Muscle pain
Toothache
Cold and flu associated pain

Dosage & Administration:

Dosage should be taken as directed by the physician.
Tablet should be swallowed whole with water, preferably after meals.

Pharmacological Action:

Paracetamol works by inhibiting prostaglandin synthesis in the central nervous system and by acting on the hypothalamic heat-regulating center, which helps reduce fever and relieve pain.

Side Effects:

Nausea
Allergic reactions (rare)
Skin rash
Liver dysfunction in case of overdose

Precautions & Warnings:

Use under medical supervision only.
Do not exceed the recommended dosage as overdose may cause serious liver damage.
Use cautiously in patients with liver disorders or chronic alcohol consumption.

Drug Interactions:

May interact with anticoagulants, certain anticonvulsants, and other hepatotoxic drugs.
Consult physician before using with other medications.

Storage:

Store below 25°C in a dry place.
Protect from light and moisture.
Keep out of reach of children.
