

Paroxyle 25 CR

Paroxetine 25mg Prolonged Release Tablets

An Antidepressant for Mood and Anxiety Disorders

Composition (Per Tablet):

- **Paroxetine I.P.** – 25mg (Prolonged Release)

Product Overview:

Paroxetine is a **selective serotonin reuptake inhibitor (SSRI)** commonly prescribed for the treatment of **depression, anxiety disorders, and obsessive-compulsive disorder (OCD)**. The **prolonged-release** formulation ensures a steady release of the drug over time, providing consistent therapeutic effects while minimizing side effects. Paroxetine works by **increasing serotonin levels** in the brain, which helps regulate mood, anxiety, and overall emotional balance.

This extended-release tablet offers **once-daily dosing**, improving convenience and patient adherence to therapy.

Key Benefits:

- **Effective in treating major depressive disorder (MDD)**
- **Reduces symptoms of anxiety**, including **generalized anxiety disorder (GAD), social anxiety disorder, and panic disorder**
- **Relieves obsessive-compulsive symptoms** in OCD
- **Effective for post-traumatic stress disorder (PTSD) and premenstrual dysphoric disorder (PMDD)**
- **Prolonged-release formulation** for stable blood levels and reduced side effects
- **Once-daily dosing** for improved compliance

How It Works:

Paroxetine works by **inhibiting the reuptake of serotonin** in the brain. This action **increases serotonin levels**, which helps regulate mood and emotions, thereby improving symptoms of depression, anxiety, and OCD. The **prolonged-release** formulation ensures a **steady release** of the drug throughout the day, offering consistent therapeutic benefits.

Indications:

- **Major depressive disorder (MDD)**
- **Generalized anxiety disorder (GAD)**
- **Panic disorder**
- **Social anxiety disorder (SAD)**
- **Obsessive-compulsive disorder (OCD)**
- **Post-traumatic stress disorder (PTSD)**
- **Premenstrual dysphoric disorder (PMDD)**

Dosage & Administration:

- **Usual Adult Dose:** 25mg once daily, typically taken in the morning
- The dose may be **increased gradually** up to 50mg per day, based on individual response
- **Swallow whole with water**; do not crush or chew the tablet
- Can be taken with or without food
- **Follow your doctor's instructions** for optimal dosing

Precautions & Warnings:

- Not recommended for use in patients with **severe liver or kidney impairment**
- May cause **drowsiness, dizziness, or difficulty concentrating**; avoid operating heavy machinery until you know how this medication affects you
- May increase the risk of **suicidal thoughts and behavior**, particularly in children, adolescents, and young adults

- Gradual dose adjustments are recommended to reduce the risk of withdrawal symptoms upon discontinuation
- **Monitor for serotonin syndrome** (e.g., agitation, confusion, tremors, fever) if taken with other serotonergic medications
- Caution in patients with a **history of seizures, glaucoma, or bipolar disorder**
- Consult a doctor before use if **pregnant or breastfeeding**
