

Peblegest MTM 10

Medroxyprogesterone acetate (10mg) **Tablets**

Feel relaxed in those painful days

Medroxyprogesterone Acetate:

Medroxyprogesterone is a progestin (a form of progesterone), a female hormone that helps regulate ovulation (the release of an egg from an ovary) and menstrual periods. Novugest M10 is used to treat conditions such as absent or irregular menstrual periods, or abnormal uterine bleeding. It is also used to decrease the risk of endometrial hyperplasia (a condition that may lead to uterine cancer) while taking estrogens. Medroxyprogesterone is also used to prevent over growth in the lining of the uterus in post menopausal women who are receiving estrogen hormone replacement therapy.

Relief from hot flashes, night sweats and vaginal symptoms
