

Information For the User
Perindopril erbumine 4 mg tablet

Perihype tablet

Brand Name: Perihype Tablet

Composition:

Each film-coated tablet contains:

Perindopril Erbumine IP equivalent to Perindopril 4 mg

Therapeutic Indication:

Indicated for the treatment of mild to moderate essential hypertension

Also used in the management of stable coronary artery disease and heart failure with reduced ejection fraction (HFrEF)

Helps reduce blood pressure and lowers the risk of cardiovascular events

Mechanism of Action:

Perindopril is an angiotensin-converting enzyme (ACE) inhibitor

It prevents the conversion of angiotensin I to angiotensin II a potent vasoconstrictor

This results in vasodilation decreased aldosterone secretion reduced sodium and water retention and lowered blood pressure

Improves endothelial function and reduces vascular remodeling

Dosage & Administration:

Usual adult dose: one tablet (4 mg) once daily preferably in the morning before food

Dose may be adjusted based on clinical response renal function and concomitant therapy

Maximum antihypertensive effect may take several weeks

Contraindications:

Hypersensitivity to Perindopril other ACE inhibitors or any excipient

History of angioedema associated with ACE inhibitor therapy

Pregnancy and lactation

Severe renal impairment bilateral renal artery stenosis

Warnings & Precautions:

Monitor renal function electrolytes and blood pressure regularly

Caution in patients with volume depletion heart failure or renal artery stenosis

May cause persistent dry cough reversible upon discontinuation

Discontinue immediately if pregnancy is detected due to risk of fetal toxicity

Side Effects:

Common: dizziness dry cough headache fatigue hypotension

Less common: taste disturbances nausea abdominal pain rash

Rare: angioedema hyperkalemia renal impairment

Storage:

Store in a cool dry and dark place below 25°C

Protect from moisture and direct sunlight

Keep out of reach of children

Packaging:

Perihype Tablet is available in blister or alu-alu strip packs

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
