

Ranilair 25

Injection

Ranitidine Injection I.P. 25 mg/2 ml.

Ranitidine is a potent **H₂-receptor antagonist** that reduces gastric acid secretion.

Provides **rapid relief** from conditions such as gastritis, peptic ulcers and acid related disorders.

Helps in the management of **Zollinger-Ellison syndrome** and pathological hypersecretory conditions.

Effective in controlling **heartburn** and gastroesophageal reflux symptoms.

Suitable for **I.M. / I.V.** administration ensuring better bioavailability and faster action.

Indications

Peptic Ulcer

Gastritis

Gastroesophageal
Reflux Disease

Zollinger-Ellison
Syndrome

Stress Ulcer
Prophylaxis

Composition :

Ranitidine I.P 25mg
