

Specific Approach For Better Motility

RibziffTM L

Rabeprazole (20mg) EC +
Levosulpiride (75mg) SR **Capsules**

- Superior acid reflux control by anti-emetic and prokinetic effects.
- Excellent dissolution of Rabeprazole and Levosulpiride in intestine stomach respectively.
- Decreases frequency and intensity of individual symptoms like pain/discomfort, fullness, bloating, early satiety, pyrosis, regurgitation and nausea and vomiting.
- Significant reduction in gastric emptying time by 96 minutes.
- All symptoms almost disappear by the 30'th day
- Better overall clinical improvement than domperidone
