Rivafoli 15 tablet

Brand Name: Rivafoli 15 Tablet

Dosage Form: Tablet

Composition:

Each tablet contains:
Rivaroxaban I.P. 15 mg

Therapeutic Segment:

Cardiovascular / Anticoagulant Segment

Therapeutic Indication:

Indicated for:

- Treatment of deep vein thrombosis (DVT) and pulmonary embolism (PE).
 - Prevention of recurrent DVT and PE.
 - Prevention of stroke and systemic embolism in patients with non-valvular atrial fibrillation (as per physician's guidance).
- It helps in **reducing the risk of blood clot formation** and maintaining proper blood circulation.

Mechanism of Action:

- **Rivaroxaban** is a direct Factor Xa inhibitor.
- It selectively inhibits Factor Xa, preventing thrombin formation and subsequent clot development.
- Provides rapid anticoagulation without the need for routine coagulation monitoring.

Dosage & Administration:

- Take orally with water, preferably with food to enhance absorption.
- The usual dosage for DVT/PE treatment: 15 mg twice daily for the initial 21 days, followed by 20 mg once daily or as directed by the physician.
- Swallow tablets whole; do not crush or chew.

Contraindications:

- Active pathological bleeding.
- Severe hypersensitivity to Rivaroxaban.
- Hepatic disease associated with coagulopathy.

Warnings & Precautions:

- Use with caution in patients with renal or hepatic impairment, elderly patients, or those at high risk of bleeding.

- Discontinue prior to surgical procedures as advised by a physician.
- Avoid concomitant use with strong CYP3A4 inhibitors/inducers unless medically indicated.

Side Effects:

- Common: Bleeding (nose, gums, bruising), anemia.
- Rare: Gastrointestinal bleeding, hypersensitivity reactions, hematoma formation.
