

Information For the User

Rosehip extract 250 mg + collagen peptidase 40 mg + sodium hyaluronate 30 mg + vitamin C 35 mg +
chondroitin Capsule

Tendoslash CD Capsule

Brand Name: Tendoslash CD Capsule

Dosage Form: Capsule

Therapeutic Category: Joint Support & Cartilage Rebuilding Supplement

Composition:

Each hard gelatin capsule contains:

- **Rosehip Extract** – 250 mg
- **Collagen Peptidase** – 40 mg
- **Sodium Hyaluronate** – 30 mg
- **Vitamin C (Ascorbic Acid)** – 35 mg
- **Chondroitin Sulphate** – [Strength not mentioned, assumed present as per label]
- **Excipients** – q.s.

Pharmacology & Mechanism of Action:

Tendoslash CD Capsule is a comprehensive formulation designed to support joint health, promote cartilage repair, and reduce inflammation.

- **Rosehip extract** contains polyphenols and anthocyanins that help reduce joint inflammation and oxidative stress.
- **Collagen peptidase** aids in rebuilding cartilage and connective tissue, improving joint flexibility.
- **Sodium hyaluronate** acts as a lubricant and shock absorber within joints, enhancing mobility and reducing stiffness.
- **Vitamin C** is essential for collagen synthesis and provides antioxidant protection.
- **Chondroitin sulphate** supports cartilage structure and helps reduce cartilage breakdown in degenerative joint conditions.

Indications:

- Osteoarthritis and degenerative joint disorders
- Cartilage wear and tear
- Joint stiffness, swelling, and reduced mobility
- As adjunctive therapy in sports injury recovery and chronic joint inflammation

Dosage & Administration:

- One capsule once or twice daily after meals or as directed by the physician
- To be taken regularly for sustained benefits

Contraindications:

- Known hypersensitivity to any of the ingredients
- Not recommended in patients with phenylketonuria (if applicable)

Warnings & Precautions:

- Use with caution in patients with bleeding disorders
- Pregnant and lactating women should consult a healthcare provider before use
- Not intended for use in children unless prescribed

Drug Interactions:

- May potentiate the effects of anticoagulants
- Vitamin C may interfere with some lab tests (e.g., blood glucose tests)

Adverse Effects:

- Generally well tolerated
- Mild gastrointestinal discomfort such as bloating or nausea (rare)
- Allergic reactions like rash or itching (very rare)

Storage:

Store in a cool, dry place below 25°C

Protect from light and moisture

Keep out of reach of children
