Rosutyle C 20 Capsule

Rosutyle C 20 Capsule

(Rosuvastatin 20 mg + Clopidogrel 75 mg Capsule)

Composition:

Each capsule contains:

- **Rosuvastatin Calcium I.P.** (as pellets) equivalent to **Rosuvastatin 20 mg**
- **Clopidogrel Bisulphate I.P.** equivalent to **Clopidogrel 75 mg**
- **Excipients q.s.**

Description:

Rosutyle C 20 Capsule is a **dual-action cardiovascular medication** that combines **Rosuvastatin (a statin)** and **Clopidogrel (an antiplatelet drug)**. This combination helps in the **management of dyslipidemia and prevention of cardiovascular events** by reducing **cholesterol levels** and preventing **blood clot formation**.

Pharmacological Action:

- **Rosuvastatin (20 mg) - HMG-CoA Reductase Inhibitor (Statin):**
 - Reduces **LDL cholesterol (bad cholesterol)**
 - Increases **HDL cholesterol (good cholesterol)**
 - Lowers **triglycerides**
 - Reduces **cardiovascular risk**
- **Clopidogrel (75 mg) - Antiplatelet (P2Y12 Inhibitor):**
 - Prevents **platelet aggregation**
 - Reduces risk of **heart attack and stroke**
 - Enhances **blood flow in arteries**

Indications:

Rosutyle C 20 Capsule is used for:

- **Dyslipidemia & Hypercholesterolemia (High Cholesterol)**
- **Prevention of Atherosclerotic Cardiovascular Disease (ASCVD)**
- **Coronary Artery Disease (CAD)**

Dosage & Administration:

- **Usual Dose: One capsule daily** (or as prescribed)
- Take with **water, with or without food**
- **Do not crush or chew**; swallow whole

Contraindications:

- **Active liver disease** or persistent **elevated liver enzymes**
- **Bleeding disorders or history of gastrointestinal bleeding**
- **Severe renal impairment**
- **Pregnancy & lactation** (Category X for Rosuvastatin)
- **Hypersensitivity** to any component of the formulation

Warnings & Precautions:

- **Liver function monitoring:** Regular **LFTs** required
- **Muscle toxicity (Rhabdomyolysis risk):** Monitor for **muscle pain or weakness**
- **Bleeding risk:** Caution in patients with **bleeding disorders** or **recent surgery**
- **Drug Interactions:** Avoid concurrent use with **anticoagulants, fibrates, cyclosporine**
- **Not for use in pregnancy:** Effective **contraception** required

Side Effects:

- **Common:** Headache, dizziness, muscle pain, stomach discomfort
- **Serious:** Liver enzyme elevation, myopathy, increased bleeding tendency

Drug Interactions:

- **Increased bleeding risk with:** Warfarin, NSAIDs, Aspirin
- **Increased statin toxicity with:** Fibrates, Cyclosporine, Macrolide antibiotics

Storage Conditions:

- Store in a **cool, dry place** below **30°C**
- Protect from **light & moisture**
- Keep out of reach of **children**

Conclusion:

Rosutyle C 20 Capsule is an **effective therapy** for **cholesterol control** and **cardiovascular risk prevention**, particularly in patients with **high cholesterol, atherosclerosis, or a history of heart attack/stroke**.

Regular monitoring of liver enzymes and bleeding risk is recommended.
