

# Rosutyle C 20 Tablet

## Rosutyle C 20 Tablet

*(Rosuvastatin 20 mg + Clopidogrel 75 mg Tablet)*

### Composition:

Each film-coated tablet contains:

- **Rosuvastatin I.P.** – 20 mg
- **Clopidogrel I.P.** – 75 mg

### Description:

Rosutyle C 20 Tablet is a **dual-action cardiovascular therapy** combining a **statin (Rosuvastatin)** and an **antiplatelet agent (Clopidogrel)**. It is primarily used for the **prevention of heart attacks, strokes, and atherosclerosis** in patients at high cardiovascular risk.

### Pharmacological Action:

- **Rosuvastatin (Statin):** Lowers **LDL (bad cholesterol)**, increases **HDL (good cholesterol)**, and prevents plaque buildup in arteries.
- **Clopidogrel (Antiplatelet Agent):** Inhibits platelet aggregation to reduce **blood clot formation**, lowering the risk of cardiovascular events.

### Indications:

Rosutyle C 20 Tablet is prescribed for:

- **Prevention of heart attacks & strokes** in high-risk patients
- **Coronary artery disease (CAD) & atherosclerosis**
- **Dyslipidemia with cardiovascular risks**
- **Peripheral artery disease (PAD)**
- **Post-cardiac procedures (Angioplasty, Stent placement, CABG)**

### Dosage & Administration:

- **Recommended Dose:** **One tablet daily** or as directed by a physician.
- Take with **water after meals** to reduce acidity.
- **Do not crush or chew** the tablet.

### Contraindications:

- **Active bleeding disorders (peptic ulcer, hemorrhagic stroke)**
- **Severe liver or kidney disease**

- **Hypersensitivity to rosuvastatin or clopidogrel**
- **Pregnancy & breastfeeding (only under doctor's supervision)**

### **Warnings & Precautions:**

- **Monitor liver function (LFTs) regularly**
- **Increased bleeding risk** – Caution in patients undergoing surgery
- **Risk of muscle toxicity (Myopathy)** – Report unexplained muscle pain
- **Avoid excessive alcohol consumption**

### **Adverse Effects:**

- **Common:** Nausea, headache, stomach discomfort, dizziness
- **Serious:** Muscle pain (rhabdomyolysis), liver dysfunction, allergic reactions, bleeding complications

### **Drug Interactions:**

- **Anticoagulants (Warfarin, Heparin):** Increased bleeding risk
- **NSAIDs (Ibuprofen, Aspirin):** May interfere with clopidogrel's effect
- **Other statins or fibrates:** Higher risk of muscle toxicity

### **Storage:**

- Store below **30°C**, in a **cool, dry place**.
- Keep out of reach of **children**.

### **Conclusion:**

Rosutyle C 20 Tablet is an effective **cardiovascular protection therapy** for patients requiring **cholesterol management and blood clot prevention**. By combining **rosuvastatin and clopidogrel**, it reduces the risk of **atherosclerosis, heart attacks, and strokes**, supporting **long-term heart health**.
