

Rosutyle Gold 20 Tablet

Rosutyle Gold 20 Tablet

(Aspirin 75 mg + Rosuvastatin 20 mg + Clopidogrel 75 mg Tablet)

Composition:

Each film-coated tablet contains:

- **Aspirin I.P.** – 75 mg
- **Rosuvastatin I.P.** – 20 mg
- **Clopidogrel I.P.** – 75 mg

Description:

Rosutyle Gold 20 Tablet is a **cardioprotective combination** used to **prevent heart attacks, strokes, and other cardiovascular events** in high-risk patients. It contains **antiplatelet and lipid-lowering agents**, making it essential for **patients with coronary artery disease (CAD), post-stent placement, and dyslipidemia**.

Pharmacological Action:

- **Aspirin (Antiplatelet Agent):** Inhibits platelet aggregation, reducing the risk of clot formation.
- **Rosuvastatin (Statin):** Lowers **LDL (bad cholesterol)**, increases **HDL (good cholesterol)**, and prevents plaque buildup.
- **Clopidogrel (Antiplatelet Agent):** Further prevents blood clot formation, reducing the risk of stroke and heart attack.

Indications:

Rosutyle Gold 20 Tablet is prescribed for:

- **Cardiovascular disease prevention** (Heart attack, stroke, unstable angina)
- **Post-percutaneous coronary intervention (PCI) / Stent placement**
- **Atherosclerosis & Coronary Artery Disease (CAD)**
- **Dyslipidemia in high-risk patients**
- **Peripheral Artery Disease (PAD)**

Dosage & Administration:

- **Recommended Dose: One tablet daily** or as directed by a physician.
- Take with **water after meals** to minimize gastric irritation.
- **Do not chew or crush** the tablet.

Contraindications:

- **Active bleeding disorders** (e.g., peptic ulcer, hemorrhagic stroke)
- **Severe liver or kidney impairment**
- **Hypersensitivity to aspirin, rosuvastatin, or clopidogrel**
- **Pregnancy & breastfeeding** (use only if prescribed by a doctor)

Warnings & Precautions:

- **Increased Bleeding Risk:** Use cautiously in **patients undergoing surgery**.
- **Liver Function Monitoring:** Regular **LFTs (Liver Function Tests)** are advised.
- **Muscle Toxicity Risk:** Watch for **muscle pain or weakness** (myopathy risk).
- **Gastric Irritation:** Take with food to reduce acidity risk.

Adverse Effects:

- **Common:** Headache, nausea, acidity, muscle pain, dizziness
- **Serious:** Gastrointestinal bleeding, liver dysfunction, allergic reactions

Drug Interactions:

- **Anticoagulants (Warfarin, Heparin):** Increased bleeding risk
- **NSAIDs (Ibuprofen, Naproxen):** May interfere with aspirin's effect
- **Statins or fibrates:** Higher risk of muscle toxicity
- **Proton Pump Inhibitors (PPIs):** May reduce clopidogrel effectiveness

Storage:

- Store below **30°C**, away from **direct sunlight and moisture**.
- Keep out of reach of **children**.

Conclusion:

Rosutyle Gold 20 Tablet is an **advanced cardiovascular therapy** that combines **antiplatelet and lipid-lowering benefits**. It is highly effective in **reducing the risk of heart attacks, strokes, and arterial blockages**, making it an essential medication for **cardiovascular disease management**.
