

Information For the User
Rosuvastatin 5 mg tablet

Rosumore 5 Tablet

Brand Name: Rosumore 5 Tablet

Composition:

Each film-coated tablet contains:

Rosuvastatin Calcium IP equivalent to Rosuvastatin 5 mg

Therapeutic Indication:

Indicated for the treatment of primary hypercholesterolemia, mixed dyslipidemia, and familial hypercholesterolemia

Helps reduce elevated total cholesterol, LDL-C, apolipoprotein B, and triglycerides

Increases HDL-C levels and reduces the risk of cardiovascular events

Can be used for primary prevention in patients with multiple risk factors for cardiovascular disease

Mechanism of Action:

Rosuvastatin is an HMG-CoA reductase inhibitor that inhibits hepatic cholesterol synthesis, upregulates LDL receptors, and increases the clearance of LDL-C from plasma

Leads to a reduction in total cholesterol, LDL-C, apolipoprotein B, and triglycerides, while modestly increasing HDL-C

Dosage & Administration:

Usual adult dose: one tablet once daily or as directed by the physician

Can be taken with or without food

Preferably taken at the same time each day

Dose may be adjusted based on lipid response, renal function, and tolerability

Contraindications:

Hypersensitivity to Rosuvastatin or any component of the formulation

Active liver disease or unexplained persistent elevations of hepatic transaminases

Pregnancy and lactation

Severe renal impairment

Warnings & Precautions:

Monitor liver function tests before initiating therapy and periodically thereafter

Use with caution in patients with a history of myopathy or risk factors for rhabdomyolysis

Discontinue immediately if pregnancy occurs

Avoid concomitant use of other hepatotoxic drugs unless prescribed

Side Effects:

Common: headache, myalgia, abdominal pain, nausea

Less common: constipation, dizziness, rash

Rare: rhabdomyolysis, elevated liver enzymes, hypersensitivity reactions

Storage:

Store in a cool, dry, and dark place below 25°C

Protect from moisture and light
Keep out of reach of children

Packaging:

Rosumore 5 Tablet is available in blister or strip packs

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
