

Information For the User  
Rosuvastatin 20 mg + fenofibrate 160 mg tablet

# Rosumore F 20 Tablet

Rosumore F 20 Tablet

## Composition:

Rosuvastatin Calcium IP equivalent to Rosuvastatin 20 mg

Fenofibrate IP 160 mg

Dosage Form: Tablet

---

## Description

Rosumore F 20 Tablet is a combination of a statin and a fibrate used for comprehensive lipid management. It helps in reducing elevated LDL cholesterol, triglycerides, and total cholesterol while improving HDL cholesterol levels. This dual-action formulation provides effective control of mixed dyslipidemia and supports cardiovascular risk reduction.

---

## Indications

Rosumore F 20 Tablet is indicated for:

- Mixed dyslipidemia
- Hypercholesterolemia with hypertriglyceridemia
- Patients at high risk of cardiovascular diseases

It helps in controlling abnormal lipid levels and preventing atherosclerotic complications.

---

## Side Effects

Commonly reported side effects may include:

- Headache
- Gastrointestinal discomfort
- Muscle pain or weakness
- Mild elevation of liver enzymes

Most side effects are mild and transient. Serious adverse effects are rare when used as prescribed.

---

## Important Notice

- To be used strictly under medical supervision
  - Not recommended in patients with active liver disease or severe renal impairment
  - Monitor liver function tests and lipid profile periodically
  - Discontinue and consult a physician if unexplained muscle pain or weakness occurs
- 

## Storage Conditions

Store below 25°C in a cool, dry place.  
Protect from light and moisture.  
Keep out of reach of children.
