

SET HER MIND FREE FROM CONCEPTION...

Smilepill™ 21
Tablets

Ethinyl Estradiol (0.03mg) + Levonorgestrel (0.15mg)

Levonorgestrel, in the single-agent emergency Contraceptive form, is indicated for the prevention of pregnancy. It inhibits the rupture of follicles and viable egg release from the ovaries. Levonorgestrel binds to progesterone and androgen receptors and slow the release of gonadotropin releasing hormone from the hypothalamus

In addition to preventing pregnancy, Smilepill 21 provides certain benefits like

- Menstrual cycles may become more regular•
- Blood flow during menstruation may be lighter and less iron may be lost. Therefore, anemia due to iron deficiency is less likely to occur
- Pain or other symptoms during menstruation may be encountered less frequently
- Non-cancerous cysts or lumps in the breast may occur less frequently
- Acute pelvic inflammatory disease may occur less frequently
- Provide some protection against developing cancer of the ovaries and cancer of the lining of the uterus

Indications

☒ oral contraceptive Unprotected sex Contraceptive failure Birth Control Pills
