

Information For the User
Tacrolimus (1mg) Capsule

Tacrofoli 1 Capsule

Brand Name: Tacrofoli 1 Capsule

Dosage Form: Capsule

Composition:

Each hard gelatin capsule contains:

- **Tacrolimus IP 1 mg**
-

Description:

Tacrofoli 1 Capsule contains **Tacrolimus**, an immunosuppressant that helps prevent organ transplant rejection and manage certain autoimmune disorders. It works by **suppressing T-lymphocyte activation and modulating immune responses**.

Indications:

Indicated for:

- Prevention of organ transplant rejection (kidney, liver, heart)
- Management of autoimmune diseases as directed by the physician

It helps in **reducing immune-mediated tissue damage and maintaining graft function**.

Dosage & Administration:

Dosage should be individualized as per physician's guidance.

Swallow capsules whole with water, preferably on an empty stomach.

Pharmacological Action:

Tacrolimus binds to FK-binding protein (FKBP), inhibiting calcineurin. This blocks transcription of interleukin-2 and other cytokines, suppressing T-cell activation.

Side Effects:

Mild tremors, headache, or gastrointestinal discomfort may occur in some patients.

Warnings & Precautions:

- Monitor kidney function, blood pressure, and blood glucose regularly.

- Avoid live vaccines during therapy.
 - Blood level monitoring is recommended to prevent toxicity.
-

Drug Interactions:

May interact with CYP3A4 inhibitors or inducers, nephrotoxic drugs, and other immunosuppressants.

Storage:

Store below 25°C in a cool, dry place. Protect from light and moisture.
Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.
