

*In serious & life threatening infections You & Your **Ultimate Decision** can **SAVE LIVES***

Ticotyle-200

Teicoplanin 200mg Injection

- Strongly active against most of the Gram +ve staphylococci, streptococci & pneumococci including anaerobic cocci & Gram-ve rods.
- Ensures faster & complete absorption.
- Successful in the treatment of streptococcal pharyngitis, Gram +ve coccal otitis media, pneumonia & pyoderma both in adults & children.
- Suitable substitute in Gram positive coccal infections where penicillin is contraindication.

Longer half life

Teicoplanin has a longer half-life so can be given once daily, whereas vancomycin needs to be given in 3-4 divided doses

In.

Skin & soft tissue Infections

Urinary tract infections

Septicaemia

Lower respiratory tract infections
