

**In serious & life threatening infections You & Your *Ultimate Decision* can SAVE LIVES**

# Ticotyle-400

## Teicoplanin 400mg Injection

- Strongly active against most of the Gram +ve staphylococci, streptococci & pneumococci including anaerobic cocci & Gram-ve rods.
- Ensures faster & complete absorption.
- Successful in the treatment of streptococcal pharyngitis, Gram +ve coccal otitis media, pneumonia & pyoderma both in adults & children.
- Suitable substitute in Gram positive coccal infections where penicillin is contraindication.

### **Longer half life**

**Teicoplanin has a longer half-life so can be given once daily, whereas vancomycin needs to be given in 3-4 divided doses**

**In.**

**Skin & soft tissue Infections**

**Urinary tract infections**
