

Information For the User
Caroverine (20mg) Capsule

Tinifix 20 Capsule

Brand Name: Tinifix 20 Capsule

Dosage Form: Capsule

Composition:

- **Caroverine I.P. 20 mg**

Therapeutic Segment:
Neurology / CNS Segment

Therapeutic Indication:

Tinifix 20 Capsule is indicated for the **management of neurological disorders** associated with nerve hyperactivity or spasm. It is commonly prescribed for:

- **Tinnitus (ringing in the ears)**
- **Spasticity-related conditions**
- **Neuropathic pain**

It helps in **relieving abnormal nerve excitability and improving neurological function.**

Mechanism of Action:

- **Caroverine** is a **neuronal membrane stabilizer** and **calcium channel blocker**.
- It works by **inhibiting excessive nerve firing**, which helps reduce **spasm, hyperactivity, or tinnitus-related symptoms**.

Dosage & Administration:

- Take **as directed by the physician**, usually **once or twice daily**.
- Swallow the capsule **whole with water**, preferably **after meals**.

Contraindications:

- Hypersensitivity to **Caroverine**
- Severe **liver or kidney impairment**

Warnings & Precautions:

- Use caution in patients with **hepatic or renal disorders**.
- Monitor for **neurological changes or adverse reactions** during therapy.

Possible Side Effects:

- Mild dizziness or headache

- Nausea or gastrointestinal discomfort
- Rare: allergic reactions or low blood pressure

Storage:

Store in a **cool, dry place below 25°C**, protected from light and moisture.

Segment:

Neurology / CNS Segment – It helps in **reducing nerve hyperactivity, managing tinnitus, and improving neurological function.**
