

Tobraxyle-FML

5 ML

Eye/Ear Drops

Tobramycin Sulphate USP 0.3% w/v + Fluometholone I.P. 0.1% w/v Eye/Ear Drop

Tobramycin

- Highly active against staphylococci, S aureus and S. epidemidis including penicillin-resistant strains
- Exhibits rapid penetration into the aqueous humour
- Highly effective in controlling both superficial and deep infections
- Possesses superior safety profile compared to gentamicin

Fluorometholone

- Inhibits the edema, fibrin deposition, capillary dilation & scar formation associated with inflammation.
- Safe for long term use

* Dependable saviour of Ocular health *
