Tolprist E Tablet

Tolprist E Tablet

Dosage Form: Tablet

Composition:

Each film coated tablet contains:

Tolperisone Hydrochloride I.P. 150 mg

Etoricoxib I.P. 90 mg

Description:

Tolprist E Tablet is a combination formulation containing Tolperisone, a muscle relaxant, and Etoricoxib, a selective COX-2 inhibitor. It is indicated for the management of musculoskeletal pain, muscle spasms, and inflammatory conditions. The combination provides relief from pain, stiffness, and discomfort associated with musculoskeletal disorders while improving mobility and functional activity.

Indications:

Muscle spasm and spasticity

Acute and chronic musculoskeletal pain

Back pain and cervical spondylosis

Osteoarthritis and other inflammatory musculoskeletal conditions

Dosage & Administration:

Dosage should be taken as directed by the physician.

Tablet should be swallowed whole with water, preferably after meals.

Pharmacological Action:

Tolperisone acts centrally by inhibiting polysynaptic reflexes in the spinal cord, leading to muscle relaxation and reduction of spasticity.

Etoricoxib selectively inhibits cyclooxygenase-2 (COX-2), reducing prostaglandin synthesis, thereby providing anti-inflammatory and analgesic effects.

The combination results in effective pain relief, reduced inflammation, and improved muscle function.

Side Effects:

Gastrointestinal discomfort

Dizziness

Headache

Nausea

Rare hypersensitivity reactions

Precautions & Warnings:

Use under medical supervision only.

Use cautiously in patients with renal or hepatic impairment, hypertension, or cardiovascular

disease.

Not recommended during pregnancy and lactation unless prescribed.
Avoid concurrent use with other NSAIDs unless advised by physician.

Drug Interactions:

May interact with anticoagulants, antihypertensives, and other NSAIDs.
Consult physician before using with other medications.

Storage:

Store below 25°C in a cool, dry place.
Protect from light and moisture.
Keep out of reach of children.
