

Information For the User
Torsemide 100 mg Tablet

Torslide 100 Tablet

Brand Name: Torslide 100 Tablet

Composition:

Each film-coated tablet contains
Torsemide IP 100 mg

Therapeutic Indication:

Indicated for the treatment of edema associated with congestive heart failure, chronic renal failure, hepatic cirrhosis, and nephrotic syndrome
Also used for the management of severe hypertension resistant to other diuretics
Helps reduce fluid overload and control blood pressure in patients requiring high-dose loop diuretics

Mechanism of Action:

Torsemide is a loop diuretic that inhibits the $\text{Na}^+/\text{K}^+/\text{2Cl}^-$ co-transporter in the thick ascending limb of the loop of Henle
This results in increased excretion of sodium, chloride, potassium, and water, producing diuresis
Leads to reduced blood volume, decreased preload, and lowered blood pressure

Dosage & Administration:

Usual adult dose: 10 to 100 mg once daily depending on the condition and severity, or as directed by the physician
Take with or without food
Dose adjustment may be required based on renal function, clinical response, and patient tolerance
For edema resistant to other diuretics, higher doses such as 100 mg may be prescribed under strict medical supervision

Contraindications:

Hypersensitivity to Torsemide, sulfonamides, or any component of the formulation
Anuria or severe renal impairment
Hepatic coma or pre-coma
Electrolyte depletion, especially hypokalemia or hyponatremia

Warnings & Precautions:

Monitor serum electrolytes, renal function, and blood pressure regularly
Use with caution in patients with diabetes, gout, hypotension, or hepatic dysfunction
May cause dehydration, hypotension, or ototoxicity, especially at high doses
Avoid concomitant use with other nephrotoxic or ototoxic drugs unless necessary

Side Effects:

Common: increased urination, dizziness, weakness
Less common: hypokalemia, muscle cramps, dry mouth, headache
Rare: hypotension, electrolyte disturbances, hearing impairment

Storage:

Store in a cool, dry, and dark place below 25°C
Protect from light and moisture
Keep out of reach of children

Packaging:

Torslide 100 Tablet is available in strip or blister packs

Schedule:

Schedule H Prescription Drug – To be sold by retail on the prescription of a registered medical practitioner only
