

Utilair 0.2 Injection

Methylergometrine (0.2 mg) Injection

Generic Name:

Methylergometrine maleate

Brand Names:

Methergine, Methylergometrine

Strength:

0.2 mg/mL

Formulation:

Sterile solution for intramuscular (IM) or intravenous (IV) injection

Uses:

- Used to **prevent or treat postpartum hemorrhage** (excessive bleeding after childbirth).
 - Helps the uterus contract and reduce bleeding after delivery.
-

Mechanism of Action:

Methylergometrine is a **semi-synthetic ergot alkaloid** that acts directly on the smooth muscle of the uterus to produce sustained and forceful contractions.

Dosage:

- **Standard Dose:** 0.2 mg administered **intramuscularly (IM) or intravenously (IV)** after delivery of the placenta.
 - May be repeated every **2-4 hours** as needed, but should not exceed a total of 5 doses.
-

- Always follow healthcare provider's instructions.
-

Precautions:

- **Do not use** during pregnancy (may cause uterine contractions).
 - Avoid in cases of **hypertension, preeclampsia, heart disease, or liver/kidney impairment**.
 - Use with caution in breastfeeding mothers and consult a healthcare provider before use.
-

Side Effects:

- **Common Side Effects:**
 - Nausea or vomiting
 - Abdominal pain or cramps
 - Dizziness or headache
 - **Serious Side Effects:**
 - Severe high blood pressure
 - Chest pain or tightness
 - Difficulty breathing
 - Seizures
-

Seek immediate medical attention for any severe reactions.

Administration Guidelines:

- Administer **slowly** when given intravenously (over at least **60 seconds**) to reduce the risk of sudden high blood pressure.
 - Ensure **aseptic technique** when preparing and administering the injection.
-

Storage:

- Store at **20°C to 25°C** (68°F to 77°F).
 - Protect from **light** and do not freeze.
 - Keep out of reach of children.
-

Note:

This medication should only be administered by a **qualified healthcare professional**. Follow all instructions carefully to avoid complications.
