

A Novel Anti-hyperglycemia Agent

Best in class DPP₄ INHIBITOR

Vlidaplit™ 50

Vildagliptin (50mg) Tablets

- Enhances the actions of incretin, promotes insulin secretion & suppresses glucagon secretion depending on blood glucose levels¹.
- Inhibits glucagon at high glucose but increases glucagon at low glucose.
- Better HbA_{1c} reduction of 0.6% & 0.8% in moderate & severe RI respectively¹.
- Greater reduction in FPG vs. baseline compared with sitagliptin¹
