

Information For the Use of
Piracetam (200mg) Injection

Xurocitam 60 Injection

Brand Name: Xurocitam 60 Injection

Dosage Form: Injection

Composition:

Each ml contains:

- Piracetam IP 200 mg
 - Water for Injection IP q.s.
-

Description:

Xurocitam 60 Injection contains Piracetam, a nootropic and neuroprotective agent used in the management of cognitive and neurological disorders. It is indicated for improving cerebral function and supporting neuronal activity in various neurological conditions. It helps in enhancing microcirculation, improving neuronal metabolism, and supporting cognitive performance.

Indications:

Indicated for the management of:

- Cognitive impairment and memory disorders
- Vertigo of central origin
- Cortical myoclonus
- Neurological conditions associated with impaired cerebral function

It helps in improving cognitive performance, alertness, and neurological functioning.

Dosage & Administration:

Dosage should be as directed by the physician.

Administer by intravenous or intramuscular injection under medical supervision.

Dosage may be adjusted based on clinical response and renal function.

Pharmacological Action:

- Piracetam enhances neuronal membrane fluidity and improves neurotransmission.
- It facilitates cerebral microcirculation without causing vasodilation.
- It improves oxygen utilization and metabolic activity within brain tissues.

These actions help in supporting cognitive and neurological functions.

Side Effects:

Common side effects include nervousness, insomnia, headache, nausea, and gastrointestinal discomfort.

Rarely, agitation or hypersensitivity reactions may occur.

Precautions & Warnings:

- Use with caution in patients with renal impairment
 - Dose adjustment may be required in elderly patients
 - Monitor neurological status during therapy
 - Use during pregnancy and lactation only if clearly advised by the physician
-

Drug Interactions:

Caution with anticoagulants or antiplatelet agents due to potential effects on platelet aggregation.

Inform the physician about all concomitant medications.

Storage:

Store below 25°C in a cool, dry place.

Protect from light.

Do not freeze.

Keep out of reach of children.
