

Bisopair 2.5 Tablet

Bisopair 2.5 Tablet

Composition:

Each tablet contains:

- **Bisoprolol Fumarate IP** – 2.5mg
- **Excipients** – q.s.

Description:

Bisopair 2.5 Tablet contains **Bisoprolol**, a **selective beta-blocker** used for the management of **hypertension, angina, and heart failure**. It helps lower **blood pressure, control heart rate, and improve heart function**, reducing cardiovascular risks.

Indications:

- **Hypertension (High Blood Pressure)**
- **Chronic Stable Angina**
- **Heart Failure with Reduced Ejection Fraction (HFrEF)**

Dosage & Administration:

- **Usual dose:** 2.5mg once daily or as prescribed by a physician.
- Can be taken **with or without food**, preferably at the same time each day.

Contraindications:

- **Severe bradycardia (slow heart rate)**
- **Cardiogenic shock or heart block**
- **Uncontrolled heart failure**
- **Severe liver or kidney impairment**

Warnings & Precautions:

- **Regular monitoring of blood pressure and heart rate** is advised.
- **Use with caution in diabetic patients**, as Bisoprolol may mask hypoglycemia symptoms.
- **Do not stop abruptly**, as it may cause rebound hypertension or worsen angina.

Adverse Effects:

- **Dizziness, headache, fatigue**
- **Bradycardia (slow heart rate)**
- **Low blood pressure (hypotension)**
- **Cold extremities, shortness of breath**

Storage:

- Store below **30°C**, in a **cool, dry place**, away from moisture and direct sunlight.
- Keep out of reach of **children**.
